

## Mast Climbing Working Platform

The scaffolds to be directly installed to the building face. Adaptable to every construction site.

## Mast Climbing Working Platform STC 100-Single

The universal single mast climbing working platform with a working platform width of up to 8.8 m and a maximum load bearing capacity of 1000 kg.

## Mast Climbing Working Platform STC 100-Double

The double mast climbing working platform can be flexibly extended up to a total width of 23.6 m. Maximum load bearing capacity 1400 kg!

STC 100-Single / STC 100-Double are mast climbing working platforms, which can be used fast and flexibly. Due to their modular design, they are extremely efficient.

**BORUIDA quality**  
realized in the modular system principle!

BORUIDA MCWP 100	Single-Mast
Load bearing capacity	up to 1000 kg
platform width	up to 8.8 m
Anchoring distance	6 m
Projecting mast length	3 m
Assembly height	150 m
Lifting speed	6.4 m/min(380V) 7.2 m/min(220V)

BORUIDA MCWP 100	Double-Mast
Load bearing capacity	up to 1400 kg
platform width	up to 23.6 m
Anchoring distance	6 m
Projecting mast length	3 m
Assembly height	150 m
Lifting speed	6.4 m/min(380V) 7.2 m/min(220V)
